

# STONY PLAIN SUN.

VOLUME FOURTEEN

STONY PLAIN, ALBERTA, THURSDAY, NOV 2 1933

Whole No. 684

**Remembrance Day, Nov. 11th.**  
Give a little more for your Poppy This Year.

## ROYAL CAFE, STONY PLAIN.

(Phone 33)

Two Good Places to Eat—The Royal Cafe and Home.  
Make Eating a Pleasure by Dining at The Royal.  
Try Us Once, and You'll Dine Here Always.  
Ice Cream always on hand—Phone in your orders  
and have them delivered.  
FIRST-CLASS FURNISHED ROOMS TO RENT.

**L. M. LARSON, Proprietor.**

**Notice to the Ratepayers  
of Inga M.D. No. 520.**

**'Where There's A Will, There's A Way.'**

The Councillors of Inga Municipal District earnestly appeal to every ratepayer to pay their taxes as soon as possible.

On **Saturday, Nov. 18**, the Secretary, Mr. Joe B. W., will be at the Royal Hotel Parlor, Stony Plain, at 10 a.m.

He will also be at Carvel on **Wednesday, Nov. 22**.

And at **Duffield, Saturday, Nov. 25**.

The Councillors hope to have the support of all the Ratepayers in their sincere efforts to collect taxes and put the Municipality in a better financial position.

## Flour Special!

We offer a 98-lb. bag of Ogilvie's Patent Flour for each 4½ bushels of No. 2 Wheat, off the car,

**Tuesday and Wed,  
Nov. 7th and 8th.**

Grain to be delivered to Alberta-Pacific Elevator.

This offer good only on the 7th and 8th of November.

This Flour is guaranteed; refund if not satisfied.

## Young's Grocery.

**M. MECKLENBURG, Optical Specialist**

Edmonton Office, 400a Tegner Bldg.

The Best Fitting Glasses. The Latest Styles in Frames. Glass Eyes.

— MODERATE CHARGES. —

### No Bids Made at This Sale.

Auctioneer Wallace Howe of Edmonton was accepting bids at the Postoffice corner on Saturday afternoon, when the three quarters of land in Tp. 53 Rg. 1 W5, was put up. The property was offered en bloc, and this apparently discouraged those assembled, as no bids were made. A valuation is said to have been made by authority of the Court and a reserve price set. The price is reported to have been the sum of \$18,000.

### Celebrating a Birthday.

A party of charming young people met at the home of Miss Emma Fischer on Saturday evening, to give her a surprise on the 17th anniversary of her birthday. Games and dancing helped pass a very pleasant time. A dainty lunch was served during the evening's proceedings. On leaving, in the wee sma' hours, her guests wished Miss Emma very many happy returns of the day. Among those present were—

The Misses Mary Pailer, Ruth Leeder, Ida Zucht, Elsie Goetz, Tillie Goetz, Emma Fischer, Anna Miller.

The Messrs Stan White, James White, Herb and Aubrey Parker, Neil Earle, H. Pailer.

### Freitag—Miller.

On Sunday, Oct. 29th, at Glory Hills Reform Church, by the Rev. C. H. Reppert, pastor; Miss Katherine Miller, daughter of Mr and Mrs Geo Miller, was united in the holy bonds of matrimony to Mr Jacob Freitag, of Stony Plain district.

Following the ceremony at the church, the bridal party and their guests motored to the home of the bride's parents, where a sumptuous repast was served to all. The happy couple have taken up their residence on the farm of Mr Max Kast, at Heatherdown. The bridegroom is a nephew of Mr Kast.

### Town to Go Hawaiian.

Another move in local barber circles is on the cards. The proposed move being an exchange of places between Mr Tony Sherdell, Onoway's popular hair cutter and shaver, and Mr. Phil Trapp, Stony's popular hair dresser. Mr. Sherdell is a noted musician specializing on hawaiian instruments. Mr. Sherdell has canvassed this district for pupils in his special line and expects on his arrival here to start a class, and later an orchestra composed solely of ukelele players, hawaiian guitar artists etc. On his coming he will be installed in Mr. Trapp's barber shop, Mr. Trapp going to Onoway, where he is well known.

LATER—It is intimated now that all negotiations are off unless, or until, Mr. Trapp is assured of a full class of competent beginners at the town of Onoway.

**Get It at HARDWICK'S.**

## Initiative

Initiative, or the lack of it, the development or the denial of it, appear to be quite common subjects of discussion in these days of the Great Depression. On the one hand, people are heard to say that adoption of the programme of the Socialists would result in the destruction of individual initiative, while, on the other hand, exponents of Socialism ask what initiative is left to people these days, and what initiative has an unemployed man substituting on Government relief?

Both are wrong. Socialism could not destroy individual initiative even if it would, because initiative is an attribute of the human individual, and it can be, has been, and always will be developed under any conceivable kind of government, or system, or set of circumstances. Initiative is God-given and cannot be destroyed, although its expression in definite action may be hindered, even for a time prevented.

Nor is it correct to say that present day conditions are destructive of initiative, and that there is no room for its exercise by many people at this time. Rather, the reverse is true. Necessity is said to be the mother of invention, and invention is only possible where initiative is first displayed. The necessities of the present era, therefore, an urge to greater rather than less initiative.

Not only so, but evidence is not lacking, rather it is available on every hand, demonstrating the fact that greater initiative is being manifested by thousands of hard pressed individuals than they ever thought of exercising in the days of prosperity.

After all, what is initiative? A simple dictionary definition says it is an introductory act or step; the first active procedure in any enterprise; power of taking the lead or of originating. That is, a baby shows initiative when it begins to creep, and more initiative when it takes its first toddling steps, and from that time onward through life. It cannot be destroyed.

But it can be encouraged, or discouraged; its development can be assisted or retarded. Parents and teachers have a very great responsibility in this respect. Employers, too, have an obligation in much the same way towards their employees, and if they are far-seeing they will realize that it is to their own advantage, as well as promoting advancement of the employee, to encourage and assist their workers to display initiative in the tasks allotted to them. While it may be true, as sometimes charged, that Capitalism operates in some ways to lessen initiative, it is also true in quite as many other ways Capitalism has promoted initiative.

Governments, too, under whatever system may be in vogue in a country, may develop the initiative, not only of individual citizens, but of a whole people and country. Too much paternalism in a home is a deadly influence upon the development of the initiative of a child, weakening its self-reliance, and sapping its courage. In like manner, too much paternalism in government operates as a deadly influence upon the citizenship of a country, weakening the self-reliance of the people, and sapping their courage to meet the inevitable obstacles and difficulties which sooner or later in life must be met, and if success is to be achieved, overcome.

Parents should not be expected to do everything for their children; teachers should not do things for their pupils but train them to do everything they can for themselves, only so is character and ability developed; employers should not look upon their workers as mere cogs in a machine, but as thinking, intelligent human beings with personalities and abilities and thinking powers of their own to develop and use for the common good of all. Governments are the creation of people in the mass to do for them what they, as individuals, cannot alone do for themselves, but Governments were never intended to perform those services which the individual can and ought to do for himself and herself.

Referring back to our dictionary definition of initiative,—that it is the power of taking the lead or of originating,—the truth must be impressed upon us that, in the final analysis, it is the individual that must originate. In any great enterprise, or undertaking, in any large corporation, it is some one individual who first originated the idea to the development of which the organized forces of all are finally directed. Governments are only groups of individuals, and their policies have their birth in the minds of individuals, and their acts of administration are but the carrying into effect of a policy resulting from the initiative of some individual in the first instance, the wisdom and value of which is ultimately recognized by all.

A man or woman lacking in initiative never gets very far. If they are content to let others do their reading, study and thinking for them, then they will never become educated. If they are willing to lean upon others, and rely upon the judgment of others for decisions that may have to be made, then they will always be dependents, and never independent. If they refuse to exert themselves, to express themselves, they will go through life bereft of the initiative they might and ought to have exercised upon their times and fellowmen.

Initiative is a power, let it be repeated, that all possess. But like all powers it must be used, exercised, brought into play. Only so is it of any value, and only so can it be developed, and made to be the rich thing in the life of the individual it ought to be, and only so can the rewards it is designed to bring to its possessor be won. It is a great gift, an imperishable gift, which should be highly prized, never surrendered, nor allowed to fall into disuse.

There is no substitute for potash in agriculture. It cannot be replaced in the plant's economy by soda or any other compound.

The Russians are now breeding emus for food. It would be interesting to know what the emu was used for before crosswords were invented.

## Weakening Diarrhoea Dangerous Dysentery

Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Few other diseases so quickly undermine the strength and bring about a condition of prostration and often collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effective in checking the looseness of the bowels, but at the same time it strengthens, stimulates and braces up the system.

Never be without a bottle of Dr. Fowler's. Always be prepared in case of emergency.

Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

## Science Comes To Aid

Can Help Narcotic Addicts To Overcome The Habit

Science has found a solution to the problem of the narcotic addict who attempts to free himself of the habit, anaesthetics of the United States and Canada were told at their annual congress recently in Chicago.

Three New York anaesthetists related their success in blocking nerves by means of alcohol injections effective for days and even weeks, thus relieving the patient of the torture of fever, nausea, neuralgia and other symptoms inevitably associated with stopping the use of a narcotic.

Most of the cases were those of persons who had contracted the habit as the result of intense pain during sickness or injury. Dr. M. B. Greene of New York explained, adding that it was different when the subject used narcotics from desire and was not interested in breaking the habit.

## ARM IN SLING WITH NEURITIS

A "token of gratification" this woman says she is giving when she writes of her relief from neuritis:—

"For twelve months I have had neuritis in my arm, and up till the last two weeks have had to carry it to my side when I have abandoned my sling, am able to sleep undisturbed, and can perform household duties that previously I would not have done. These benefits I have received from Kruschen Salts. This has all happened in two weeks, and I am optimistic enough to think that in another fortnight I shall have said goodbye to my neuritis and for all. Call this a testimonial if you choose—to me it is a token of gratification."

(Mrs.) N.B.L. Neuritis is a result of impurities in the blood. And it is impure blood, circulating all over the system and setting up inflammation in the tissues, that causes those excruciating pains. Kruschen Salts can be safely trusted to set the matter right. Because Kruschen contains just what Nature needs to permeate your internal organs back into a healthy, normal condition.

## Argentine Raising Peanuts

Has Gone Into New Industry On Large Scale

Coffee and beef not being so much in favor as years gone by Argentina is beginning to raise peanuts on a rather large scale. In the past crop year production amounted to 135,581, 520 pounds as compared with 129, 328, 450 pounds in the 1931-32 season, an increase of 33.5 per cent. The area harvested amounted to 193,393 acres an increase of 66.5 per cent. The average yield per acre was 892.5 pounds.

## Pains After Eating? Try This!

Pains after eating are generally due to an excess of acid in the stomach that forms gas and causes belching, indigestion, flatulence, bloating, and indigestion. Bileurated Magnesia, taken after meals will give such quick and pleasing relief you will be surprised. Any druggist will tell you ordinary Bileurated Magnesia is fine for sour acid stomach conditions. It should be in every home. It works.

## Sees Marked Improvement

United States Banker Finds Conditions in Britain Better

Quite talkative about the marked improvement in British business conditions was J. P. Morgan, United States banker, on his return to New York from an extended visit to Great Britain.

While silent on various questions put to him concerning the domestic situation here, the N.R.A., new banking laws and inflation, Mr. Morgan did emphasize that England had turned the corner away from hard times.

"England is getting on very well. Improvement certainly is well set in there. The heavy industries are showing improvement and the whole feeling there is that things are better and improving."

## Signs Are The Same

"Most women," says a writer, "can tell by looking at their husbands when they go home from work whether it will be a picture show or a quiet evening at home." At the same time most men can tell it by just looking at their wives.

## New Submarine Chaser

Royal Air Force Machine Will Be Stationed At Malta

The first Royal Air Force flying boat carrying a quick-firing gun, capable of firing shells, in addition to ordinary machine guns, has been completed by the Blackburn Airplane Company at Brough. The craft is designed principally for submarine chasing.

The new gun, which is mounted on a rotary turret in the forward cockpit, can fire 100 rounds per minute and one-half pound shells over an effective range of 1,500 yards. The shells are held in clips of five. The connection from firing all five rounds in quick time is said to temporarily reduce the forward speed of the flying boat by ten miles per hour. The experiment of mounting the gun whose recoil—representing a pull of 1,600 pounds which has to be absorbed in the boat's structure—will be watched with keen interest by air forces of several nations which are concerned with the same problem.

The machine will be able to fly 132 miles per hour with a maximum range of 1,600 miles. The wing spread is 97 feet and the length is 70 feet. It stands nearly 26 feet high. The new ship, named "Blackburn Perth," is one of four to be stationed at Malta.

## Does Not Produce Chancellors

Only Two In Last Hundred Years Born In Scotland

Where do the Chancellors come from? Scotch claims so many of the Premiers and Archbishops of Canterbury of recent years that it would not be surprising to find the Northern Kingdom providing a good proportion of Chancellors of the Exchequer as well, especially in view of the Scottish genius for looking after the babies. In reality, however, only two Chancellors in the last 100 years were born in Scotland—Sir Robert Horne was the first Lord Ritchie, Mr. Neville Chamberlain was born in Birmingham—and so was his brother, Sir Austen, who was Chancellor thirty years ago. London can claim Disraeli and a number of others. Among the counties, Yorkshire can boast of three great names—Lord Snowdon, the late Lord Oxford and Asquith, and Sir William Harcourt. But Lancashire can show three who are possibly still more famous—Mr. Lloyd George, who was born in Manchester, Gladstone, and Sir Robert Peel.

## Queer Animals In Oxford Zoo

Cat Has Fully-Developed Fur-Covered Wings

The curator of the Oxford Zoo has been puzzled by the arrival of a black and white cat which has on its back fully-developed fur-covered wings, with which it is stated it can fly. It was seen in a local garden to move from the ground to a beam, to which it could not have leaped, using its wings in a manner similar to a bird. The wings grow just in front of the hindquarters and measure a foot from tip to tip. The curator says he is somewhat sceptical whether the cat can really fly in the sense that a bird does. It is possible that its hindquarters are powerful and that it can spring to a considerable height, aided by its wings.

## FOOT COMFORT

Arch troubles, weak ankles, tired feet, swollen feet, etc. The new arch support lifts part of body weight off feet and places on leg bones. Lessens danger of corns, callouses, bunions, etc. by holding bones in proper position. Comfortable wear. Only 15¢ a pair. Send for free booklet. Write to: THE FOOTCAP COMPANY, Room 202, 105 Victoria St., Toronto, Ont.

# To Light Up In The Morning

When the sun begins to shine—and you've rolled your own—with Ogden's Fine Cut. That fragrant, friendly cigarette sure does put a smile on the day. It's so cool and satisfying. And so easy to roll. Ogden's Fine Cut and "Chanticleer" papers... you can bank on that "roll your own" combination morning, noon or night.

## Rapid Advances In Rail Engineering May Revolutionize Present Transportation Systems

It will make some folk feel and to know the day is coming fast when the present crack railroad trains of the country will look old-fashioned. The engineers who plan ways to carry humanity across the land at bird-like speeds with less expense and more comfort have spelled the doom of the giant locomotives and heavy cars of our day. It is only a matter of weeks before passengers on the Union Pacific may be whizzing along in trains that look somewhat like long silver eels. Models of the "rail-plane" and other modern forms of transportation have attracted crowds at the Chicago Exposition. Discussing these advances in rail engineering, the October Review of Reviews says that one of the new type trains will be adding along its steel road before the year is out.

Speed alone has not been the end of the quest in railroad science. The old problem of moving multitudes longer distances for less money is still the pressing problem of the nation's rail lines. New aluminum alloy trains pulled by a 600-horse-power engine in the bullet-head locomotive may make the difference between profit and loss in passenger service. It is a scientific achievement, this silver rail on rails, as well as a long jump toward efficiency.

Streamlined to glide through the wind, three cars of the rail-plane, including the "power plant" in the head, weigh but eighty tons, or no more than a Pullman sleeper. The train stands eleven feet from the ground. Its "pilot house" looks not unlike that of an airplane. It will make ninety miles an hour as its ordinary running speed, and will reduce horsepower requirements markedly compared with trains of present design.

Another rapid rail vehicle is the autotrain, which has been used abroad and has 10,000 miles of actual service to support its reputation for fast and inexpensive travel. Built of aluminum, run by a sixteen-cylinder gasoline engine, it was designed to serve passengers in units of one car or more. Its slim lines and round prow give it power to override wind resistance at high speeds.—New York Sun.

### Triumphed Over Difficulties

With Three Fingers Missing Organist Faces Final Music Test

Although three fingers are missing from his right hand, Reginald Silby Lewis was among the successful candidates at the last examination for the associate ship of the Royal College of Organists. His success is a story of triumph over exceptional difficulties.

His right hand was shattered at Ypres, where he was an artillery officer, and it was feared his ambition as an organist was entirely frustrated. However, after several operations in hospital he "came back," and passed his examination without any concession.

He had studied law for a while but music was his natural bent. His success is a triumph of will power as well as musicianship, the examination for the associate ship of the Royal College of Organists having been almost a fantastic objective at first, and now Reginald Silby Lewis holds the diploma of the world's leading school of the organ.

### Prediction Came True

The Earl of Durham's prediction in 1838 that full self-government would come to a united Canada, in which both races, British and French, would of their part, long ago proved true. The Earl was making his farewell proclamation to the people of Canada after making his report on the unfortunate conditions that caused the Rebellion of 1837. He appealed to Canadians to have faith in British principles of freedom.

### Graded According To Gift

Gifts to the state are being solicited from the citizens of Arabia, for ordinary government purposes. Five cents is the lowest sum accepted. Gifts of \$5 will earn the title of "Patriot"; of \$7.50, "Active Patriot"; of \$10, "Great Patriot"; and \$20, "Super-Patriot."

### Weaver's Shuttle May Soon Become Obsolete

Machine Which Displaces With It Has Been Invented

The weaver's shuttle is one of man's devices, and now it seems likely to become obsolete. For thirty years experts have been trying to invent a weaving machine which could dispense with it, and at last woolen materials made on a shuttleless loom are on the market. Silk and cotton will undoubtedly follow. A shuttle travels from side to side right across and through the warp, carrying the weft yarn with it. The new method is for light rods of aluminum alloy to take its place. Each rod is fitted at the end with a gripper which carries the weft half way across the warp, and transfers it to the gripper of a rod which has come halfway across from the other side. This second rod draws the thread across and the process is complete. Much elaborate mechanism is dispensed with, cost is reduced, and a greater variety of patterns is possible by the new method. Seven coils can be used in the weft of a shuttleless machine instead of the present maximum of four, and where one man is fully occupied in the present woolen weaving system with one loom, he will in future be able to work from three to six.

By Ruth Rogers

### SOMETHING REALLY JAUNTY FOR SCHOOL GIRL AND IT'S SO EASY TO MAKE IT

Here's one of the smartest ideas of the season for the little junior. It's effectively carried out in light navy blue novelty polka-dotted worsted crepe contrast. The wrapped arrangement at the front makes it so distinctive.

Style No. 809 is designed in sizes 6, 8, 10, 12 and 14 years. Size 6 requires 1 1/2 yards of 35-inch material with 1/2 yard of 35-inch contrasting. It's a model that offers endless color and fabric schemes. It is particularly nice for wool jersey and would be darning in tobacco-brown with vivid red contrast. Style of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Limited Population Does Not Guarantee Prosperity

Intelligently Directed Immigration As Times Improve Would Benefit Canada

Canada is far from being an overcrowded country. There is plenty of room for new population, new business and increased production. Intelligently directed and carefully selected immigration should not add to unemployment, and might indeed aid in its solution. The industrial machinery of the country is capable of providing for the needs of far more people than the ten million now within our borders.

There is a danger that the depression may give birth to unsound views regarding future expansion. While the present is not an opportune time to inaugurate an immediate immigration scheme on a wholesale scale there is sound sense in what Premier Bennett said recently on the subject when he pointed out that Canada's vast area and rich resources required a great population for development. Development is essential to a full realization of the prosperity that is inherent in the country. The mineral resources of Northern Ontario have been an important factor in helping to weather the depression. There is in this situation an illustration of the possibilities of the future.

A limited population of itself is no guarantee of prosperous conditions. It is not to be supposed that if Canada today had twice the present population unemployment would be any greater proportionately than it is now. A large number of new citizens could not be suddenly absorbed into the economic life of the country, it is true, but with a return of normal conditions it would be of advantage to include in the policies of the country reasonable measures for a sound and steady growth.—Toronto Evening Telegram.

### Family Record Of Chinese

Some Can Be Traced Back Over 4,000 Years

It is a matter of amazement to the western world that a young woman who had just been married in China is a descendant in the 77th generation of the great founder of Confucianism. If she traces her family record back only to the birth of Confucius, it covers 2,484 years, but Chinese historians prefer to carry it back over 4,000 years. Yet, the shorter period of nearly 25 centuries is enough to stagger the imaginations of those who boast themselves perhaps in the 11th generation descended from Roger Williams or the Pilgrims.—Providence Journal.

Trinidad expects an early increase in employment.

British West Indian lines are to be introduced into this country.

## Incomparable Treasure Of Antiquities Is Displayed At The Royal Ontario Museum

### Hints For Blind Gardeners

Booklet By Sightless Men Tells What "Gardening for the Blind" Is

"Gardening for the Blind" is the title of a booklet issued from the office of the National Institute for the Blind, Great Portland Street, London, which is affiliated with the Guild of Blind Gardeners. Just what a blind person can do in a garden is told in this booklet by blind men. One of them says: "During the past 12 years of total blindness, I have produced sufficient culinary vegetables to maintain an ample supply of all kinds of domestic use all the year around." But how can weeds be distinguished? Another blind gardener tells us. "The position of a weed is a good guide. The plants in the beds are known, and as they are placed in rows or clumps, it follows that any plant which is out of alignment is, for our purpose a weed." And here we come to what would appear to be the most difficult of gardening tasks for a blind person—mowing the lawn, though the writer calls it "the most pleasant of weekly jobs."

He admits that "it is not possible in cutting grass to keep a straight line," but considers this unnecessary. "A little practice will enable one to detect the difference in sound between the whirring of the blades when cutting or when revolving freely."

### Irrigating From Air

Experiments With Russian Invention Have Proved Success

Irrigation of the land from the air is said to be possible by a new apparatus invented by the Russian Hydro-Technical Institute and the Lenin Academy of Agriculture. It consists of those which is carried in gas-filled balloons. The hose is attached to two tractors, the water being pumped into it from an irrigation canal and sent through sprays to fall on the earth like rain. Experiments of this kind of irrigation with a much simpler apparatus on the ground, were carried out last year on a Russian State farm in Central Asia, the Pakht-Aral. The crops so watered gave a yield of 300 per cent. greater than crops watered by the canal system. The yield of winter wheat was more than doubled. The new system also will effect a great saving in the covering and maintenance of irrigation canals and will set free a large area occupied by them.

China realized nearly \$500,000 from its first national lottery.

The rest of Canada is under debt to Ontario because of the establishing in Toronto of the Royal Ontario Museum for which a magnificent new institution has recently been opened by the Provincial Government. The eastern press quotes from the London Times the opinion of an expert: "Outside London and the national museums of the British Isles generally, possibly the finest collections have been found at Toronto, where the Royal Ontario Museum, the largest of all the Dominion museums, has not only incomparable Canadian collections but also world famous collections of Chinese antiquities and art." At the official opening this "encomium was supported by the remarks of the secretary of the Smithsonian Institution at Washington.

Ontario's institution has five departments: archaeology, geology, mineralogy, palaeontology, and zoology. Of the heads of these departments Prof. C. T. Currier, F.R.S., is the best known with his seal for his job and his ability to make the dry bones of the past clothe themselves in glowing flesh.

Though its museum, which under the act providing for its foundation and maintenance must have three governors of the University of Toronto among its trustees, Ontario is saving for all of Canada many echoes of a far past of this Dominion. It is also spreading forth history of other lands and other times.

It should also prove an inspiration to the other provinces, many of which through the universities or in some governmental connection have begun the long and fascinating adventure of building up a museum.—Winnipeg Free Press.

### The World's Greatest Flyer

Lindbergh Says Kingsford-Smith And Kingsford-Smith Says Lindbergh

London raises an appeal to settle an important question: Who is the greatest flyer in the world? The query is a natural one when Sir Charles Kingsford-Smith, wing commander, clips 40 hours off the record by flying from London to Australia in 7 days, 4 hours, 44 minutes. The News Chronicle asks Col. Charles A. Lindbergh for an opinion and he replies: "I think Kingsford-Smith is the greatest flyer in the world." Then Kingsford-Smith is queried and he answers: "I don't think there is any doubt that Lindbergh is the greatest flyer in the world." And now the world will voice its own ideas on the subject—probably it will say both men are right.—Christian Science Monitor.

### Women In Business

Efficient As Men And More Loyal States Sir Charles Higham

Women will play a big part in future as collectors of income-tax in the reorganized collection service at Somerset House. It was the last branch of income-tax work to which they were admitted, and now nearly every week the appointment of a woman to the collectorate is announced.

Sir Charles Higham, speaking at an exhibition recently, said he disagreed with Sir Herbert Austin's view that it would be better for industry if women were sent out of business and back to their homes. Women were as efficient as men and, were certainly more loyal, he said.

### Hall Calne's Last Book

Sir Hall Calne's "Life of Christ" considered to be one of the most amazing literary efforts ever attempted, is ready for publication in London. When the famous novelist, who in 1931, left a manuscript of 3,500,000 words, equal to 40 novels. His sons, Ralph Hall Calne, M.P., and Derwent Hall Calne, engaged an expert who has selected material to make a work of 600,000 words. Every word of this is as Hall Calne wrote it.

Soap making is becoming modern and scientific in India.

London's trolley lines now cover 167 miles of routes.

Unannounced by any fanfare, Professor Albert Einstein, world-famed German scientist, a virtual exile from his native land, where he aroused the ire of the Nazis, is pictured as he left the pier at New York Harbour, whence he was taken by tug to Jersey City. The scientist left Princeton almost immediately, even before reporters caught up with him.

## MAY ADJOURN ARMS PARLEY UNTIL DEC. 4

Geneva, Switzerland.—Adjournment of the world disarmament conference until December 4 was recommended by its steering committee.

Simultaneously reports, originating in German circles, were current that Chancellor Hitler's government would announce the conditions for Germany's return to the arms discussions and the League of Nations after November 12 plebiscite, called when her intention to quit both councils was announced.

France served notice that the League of Nations, and not the four-power western European peace pact, must handle disarmament when Rene Massigli, the French delegate, insisted before the steering committee that all disarmament discussions must be held exclusively in Geneva.

Arthur Henderson, the British chairman of the conference, said in a speech it would be disastrous to adopt a policy which could be interpreted as unwillingness to complete the task of disarmament.

M. Massigli's contention, given in behalf of Joseph Paul-Boncour, the foreign minister in the resigned French cabinet, was apparently in reference to suggestions that Italy, France and Great Britain should negotiate for the three-power pact to replace the agreement those countries signed last summer with Germany.

The proposal for a recess, subject to the approval of the conference was made with the understanding that a reopening of discussions in December depends on the progress made in the interim, either by private conversations or through a special committee.

### Relief Distribution

#### 200 Cars Distributed Free Of Charge

In Saskatchewan Areas  
Saskatoon, Sask.—More than 200 railway box cars, loaded with produce, have been distributed free of charge this fall in needy areas of Saskatchewan. It was learned Wednesday from Dr. John L. Nicol, superintendent of missions in northern Saskatchewan for the United Church of Canada.

"If of this work has been done under the Saskatchewan relief commission with the aid of the railway companies.

People of five provinces contributed donations but residents of Saskatchewan supplied more than half of the total to less fortunate inhabitants of their own province.

### Prosperous Indians

#### Good Crops Place Indians In Favorable Position

Ottawa, Ont.—"Indians on prairie farms are remarkably prosperous at present and undoubtedly in a much better position economically than their white neighbors," says the annual report of the Indian Affairs Department. This is due to intensive agricultural.

tural assistance and instruction given these Indians during the past half century by the government. Furthermore, Indians are exempt from payment of taxes and other overhead charges.

The Indian population of Canada remains at approximately 108,000.

#### Chance To Break Record

Agassiz, B.C.—The world's egg-laying record was equalled when "Dauntless Bearer," White Leghorn pullet, laid her 351st egg in 358 days. A University of British Columbia White Leghorn, in 1920 laid 351 eggs in 364 days. "Dauntless Bearer" has a chance to break the world's record of 357 eggs for a 365-day period.

#### Attacks Roosevelt's Plan

Nottingham, England.—Sir George Paish, world-famed economist, declared in a speech here that President Roosevelt's efforts to expand the income of the United States were having serious reactions all over the world. It is very doubtful, he added, whether any country would be able to remain on the gold standard.

W. N. U., 2018

### Labor Troubles In Cuba

#### Break Again When Resignation Of Government Is Rumored

Havana, Cuba.—While a United States destroyer stood off the coast of Cuba to aid in checking serious labor disorders, official attention again swung to politics when it became known President Grau's cabinet went to the palace prepared to resign.

The resignation was said in high government circles to have been offered as a result of serious consideration of a semi-parliamentary government proposal under which a commission of 20 would be established to virtually control Cuban affairs.

President Grau held acceptance of the resignations in abeyance pending further study.

Serious labor troubles at several American-owned sugar mills worried the government as at least one American was endangered by striking workers who held him prisoner.

The United States destroyer in Oriente province, near the Alto "Twigs" was standing by off Mantilla, in Oriente province, near the Alto Cedro sugar mill, where C. M. Jerva, the American manager, was held by strikers who had formed a Soviet regime.

### Political Leader Dies

#### W. J. Bowser Is Victim Of Heart Attack

Vancouver, B.C.—Death struck unexpectedly to remove from the turbulent political scene of British Columbia one of the champions of the Independent non-partisan cause, W. J. Bowser, K.C., and inject new confusion into the already muddled election situation.

Mr. Bowser's death removed a figure familiar for 42 years in the political arena of this province. He was a former Conservative premier and had held various cabinet positions.

The veteran campaigner was the victim of a sudden heart attack. He was 65 and a native of Rexton, N.B. While political friends and foes basted to pay tribute, election officials found themselves confronted with a situation believed unique in the annals of this province.

Mr. Bowser was running in both Vancouver Centre and Victoria on the independent elections, which take place November 2. Election officials in Victoria announced the election in both ridings will be deferred until November 27.

### U.S. Carriers Seeking Minimum Lake Rate

#### Would Make Agreement Of Five Cents Per Bushel On Grain

Ottawa, Ont.—Official information obtained here is to the effect that United States lake carriers are endeavoring to reach an agreement with their Canadian competitors to fix a minimum rate on grain across the lakes of five cents per bushel.

The United States owners are working at Washington to have lake operations brought under the N.R.A. and it is understood have made good progress. They have represented to Canadian lake carriers that if the Canadian operators will agree not to cut rates below a 5-cent minimum, Washington will co-operate in fixing an N.R.A. code which will be binding upon all American carriers.

The proposed code, of course, would cover iron ore and other cargo moving between American ports, but Canada is interested only in lake rates on grain.

#### Boycotting German Goods

Montreal, Quebec.—German goods were officially boycotted by the Montreal Jewish Council of Women in a resolution adopted unanimously at a meeting of the council here. Mrs. Alfred Zimmerman, co-founder with her husband of the school of international relations at Geneva, denounced Germany and defended the attitude adopted by France.

#### Increase Is Shown

Ottawa, Ont.—An increase of 17 per cent was shown in financial transfers in the form of bank debits or amount of checks passing through the banks in September when the total was \$2,457,000,000 as compared with \$2,089,000,000 in the corresponding month of last year, according to a report issued by the Dominion Bureau of Statistics.

### MAY HEAD UNIVERSITY

Lord Irwin, former Viceroy of India, who is reported to be the likely choice for the most dignified position in the world, the chancellorship of Oxford University. The post was left vacant through the recent death of Viscount Grey of Fallodon.

### Denies Any Association With German Government

#### Representative Of Dye Corporation Buying Nickel For His Firm

Ottawa, Ont.—Expressing amusement at the suggestion that his mission to Canada for the purpose of contracting with the International Nickel Company for supplies of that metal might be connected with the re-arming of Germany, Eysten Berg, representing the I. G. Farbenindustrie, of Frankfurt-am-Main, reiterated his duties were much more peaceful. Mr. Berg arrived here with Colonel W. A. Bishop, V.C., D.S.O., Canada's flying ace.

Mr. Berg emphatically dissociated himself from any connection with the German Government. The I. G. Company, he said, was the largest dye and chemical corporation in Germany—perhaps in the world—and in its many and varied products used many metals. Nickel was one. Normally the company employed 160,000 hands in its huge plants.

### Two Thousand Marriages

#### To Be Celebrated Simultaneously In Italy In New Fascist Rite

Rome, Italy.—Two thousand marriages will be celebrated simultaneously in Rome and the province of Latium, in a new Fascist rite called "the consecration of nuptiality" to inaugurate the 12th year of Fascism and to exalt Premier Mussolini's bigger population program.

Similar ceremonies will be conducted throughout Italy at the same time. In Rome, 550 couples will meet in the ancient Church of Santa Maria Degli Angeli for a nuptial mass and to receive the benediction.

#### Embargo On Wheat

Bismarck, N.D.—North Dakota railroads reported that shipment of wheat out of the state virtually was at a standstill as a result of Gov. William Langer's embargo. They said they were ready to transport the grain but received little for shipment. Sheriffs in the 33 counties, are under the governor's order to prevent acceptance of wheat for outside shipment by all elevators.

### URGE BRITAIN TO INCREASE NAVAL STRENGTH

Two of Great Britain's most famous naval experts, Admiral Sir Ernle Basset (left), First Sea Lord of the Admiralty, and Earl Beatty (right), former chief of the British Naval Staff, broke into the news within two days of each other. Both were reported as urging Great Britain to increase her naval strength as necessary for the security of the British Empire.

### Needs Food And Livestock

#### Economists Say Russia Could Absorb World's Agricultural Surplus

London, Eng.—Observers in close touch with the Russian situation expressed amazement at a report from New York that \$500,000,000 credit was being sought on behalf of the Soviet in connection with the overtures looking to possible United States recognition—with \$450,000,000 wanted for machinery and steel rails and \$50,000,000 for cotton.

The observers said rails form one of the direct of Russian needs, but pointed out that Russia's most-urgent need is for foodstuffs, and livestock of all kinds. Independent agricultural economists here say Russia could absorb the whole world's agricultural surplus on long-term credits.

Instead, it was noted, farmers in the United States are destroying millions of pigs they could have shipped to Russia and likewise horses and cattle which could easily be transported on both land and sea.

Besides, much labor and industrial trouble in Russia would be reduced if unemployed livestock supplies were available, according to an economist who believes foodstuffs are needed more than tools.

Another source held that if the Canadian and United States wheat could be exported to Russia two years ago, it would have taken supplies off the market and at the same time would have saved Russian peasants from the famine of last winter. Anglo-Russian trade negotiations are progressing slowly and smoothly.

### Plot Frustrated

#### Attempt On Life Of Viscount Batendone Is Reported

London, Eng.—Police started an investigation into what they described as an unthought attempt on the life of Viscount Batendone, the only surviving son of Earl Willington, viceroy of India and former Governor-General of Canada.

Police were called when Miss Dorota Flatau, a neighbor of the viscount, encountered a man who said was an "Indian" crouching on the flat roof outside his apartment.

She said the man carried an 18-inch curved knife and that when she threw a flower pot at him he fled. Authorities recovered the knife and a piece of lead pipe the intruder threw at Miss Flatau.

The viscount, who was said to be going to India next Monday, was not at home when the incident occurred.

Miss Flatau, a novelist, said she was giving a party at her Victoria Square home and that when she went into her study she heard a noise outside that caused her to look out of the window. It was then she declared, that she saw the man crouching on the roof. The man, she said, was outside the viscount's bathroom.

#### Sugar Smugglers

Ottawa, Ont.—General orders have been issued by Royal Canadian Mounted Police headquarters here to its coastguard and land forces to be on the lookout for sugar smugglers. The two-cent-a-pound federal tax created possibilities for a lucrative smuggling trade, but General J. H. MacRip, commissioner of the R.C.M.P., does not believe it has reached any large scale.

## PROVISION MADE FOR JOBLESS DURING WINTER

Ottawa, Ont.—Single unemployed men will be absorbed into work camps to be established under the direction of the Department of National Defence, as part of the program for meeting the unemployment problem during the winter. These camps will be utilized for carrying out federal projects, and the Dominion will clothe, feed and house the men and give them 20 cents per day for tobacco, etc.

Agreements concluded with the provinces, it is stated, follow along lines already indicated. Again the Dominion will pay 33 1/3 per cent of the labor cost of municipal public works. The federal government will also pay 60 cents per day toward men employed on the trans-Canada Highway, and 50 cents per day for those employed on provincial highways.

In respect to such single unemployed men who are unable, for physical or other reasons, to go to the work camps, the Dominion will pay half the cost of supporting them up to a total of 40 cents a day.

Unemployment relief measures occupied the cabinet at a two and a half hour session with Hon. W. A. Gordon, Minister of Labor, outlining to the government the measures being taken and proposed. No official announcement was made at the close but Mr. Gordon said there was practically no change in the system which has been in operation for some time.

### Surrenders Pension

#### Albert Wiggin Gives Up Heavy Life Endowment

Washington.—Criticism of his retirement pay led Albert H. Wiggin, for years head of the Chase National Bank, to surrender his \$100,000-a-year-for-life cheque in a surprise announcement to the United States senate banking committee.

Interrupting the presentation of a mounting pile of evidence of the profits and risks in the Cuban operations of the \$2,000,000,000 financial house, Ferdinand Pecora, its counsel, put into the committee record without comment a letter from Wiggin to the bank board giving up his annuity.

Concurrently with a meeting of the Chase board in New York to accept Wiggin's proposal, Pecora developed in questioning Shepard Morgan, a Chase vice-president, that the bank floated \$40,000,000 in Cuban bonds in United States with knowledge of a Cuban treasury deficit and financial troubles.

#### Predicting Short Winter

Regina, Sask.—In spite of October blizzards which have swept Saskatchewan prairies, Indians of this district predict a short winter with little snow. Their predictions last year, based on muskrats and berries proved correct. The winter was long and the muskrats needed their big houses, while the frozen berries furnished food for birds. This year the signs are opposite they say.

#### Exhibit Of "Iced" Flowers

London, Eng.—"Iced" flowers from South Africa are giving London one of the most beautiful exhibitions ever staged here. Three consignments of South African wild flowers, packed in crates and transported in the cooling chambers of ships, form the nucleus of the exhibition.

#### Grant For Kingsford-Smith

Sydney, Australia.—As the result of wide public agitation for appointment of Air-Commodore Sir Charles Kingsford-Smith, famous flyer, to some public position, the federal government has announced a grant of \$15,000 to him, no position being available.

#### New Trade Transaction

North Fort, Sask.—A unique reciprocal trade transaction has been made here with the shipment of 3,000 live baby bass from the North Dakota fish and game branch to the Saskatchewan Department of Natural Resources in exchange for several thousand pickerel eggs.

### Cost of Production.

Pleas for "cost of production" of farm products are often based on the assertion that this is what the manufacturer gets, says The Pennsylvania Farmer. The argument is unfortunate because manufacturers do not get "cost of production" on all they want to produce. They get what they can, the same as the farmer. Nobody is able to get more for an article than its users can or will pay.

If this is cost of production the manufacturer or farmer continues in business. If it is less he uses his capital and credit, and when that is gone he goes broke.

The farmer may hang on longer than the manufacturer because his credit can be stretched farther; but no matter what surveys seem to prove the farmer either gets cost of production or eventually quits. There is nothing peculiar to farming that will enable it to operate indefinitely at a loss, and there is no power in government to guarantee it a profit permanently. We believe that farmers should have cost of production for what they sell, but do not believe that writing it in a code will give it to them.

25 CENTS.

## 'Tis More Important to Be Happy.

Health cranks, like all other cranks, are a nuisance. They lose sight of the idea that we all want to be happy, and they spend their time in making people afraid of this and that.

A life that is full of fears, a life that is guided by the principle that you must never do what you want to do because it is bad for you (according to some one) such a life is not a happy one.

Happiness and Health can and should go hand in hand. Do not do things because you SHOULD do them, but do them because you LIKE to do them.

Get out to the fresh air and sunshine because you like it; take baths because you enjoy these; eat fruit because you like the taste of it; drink water because it satisfies your thirst.

There is more real pleasure in living a healthy life than in any other kind of life; and that is why you want to live a healthy life.

The things the child wants to do are, as a rule, good for him, and if our tastes had not early been distorted by faulty training, the same thing might be said of adults.

It is fairly generally agreed that overweight is undesirable; nevertheless a happy and somewhat fat person is a much better citizen than is the crabbed, thin individual whose diet is the constant subject of his conversation.

There is no reason why happiness and proper weight cannot go together. What we mean is that we think it is more important to be happy than to be the correct weight.

The laws of health are a simple statement of the laws of natural living. It's because we get so far from natural living that it is necessary for us to remind ourselves of the laws of health.

Think of health as a means to an end. Health brings Happiness, and so makes life more worth while.

## 3-D1

## Brightbank News

Brightbank and Hansen's Corners farmers are considering that they are very lucky to have got their threshing done before the recent snow storm.

Mr J Scheideman's has been having quite a time with kytes killing off his sheep; he having lost as many as 3 in 1 night.

What might have been a serious accident, was avoided by good driving when the hub of Miss M Young's car broke and a front wheel came off. The car was stopped before being ditched. No one was hurt.

Mr J Young is arranging to head a party of big game hunters who are going into the Bazeau country when the season opens.

Mr J McDonald has been losing some of his young pigs of late; supposedly the work of a prowling cougar.

Mr and Mrs D McDonald were Sunday visitors at the home of Mr and Mrs James Young.

A masquerade dance is being arranged to be held in the Mewassin Schoolhouse Friday Nov. 10; good music.

No dance was held at the Lucknow schoolhouse on Hal-

## Holborn Happenings.

Despite the slippery roads and a counter attraction nearby, the dance, given under the auspices of the U.F.W.A. at the Holborn hall on Tuesday night was well attended, and the good-sized crowd had an enjoyable time dancing to the good music provided by the Barth's orchestra.

Mr and Mrs L. M. Larson and Mr and Mrs I B Bjork were dinner guests on Sunday at the home of Mr and Mrs A P Anderson.

The Ladies' Aid of Holborn United Church held a chicken-supper on Saturday night at the hall, and were pleased to see the good crowd which attended. Mr H Audrey was the winner of the big cake drawn for.

The shooters who go after them, are still getting good bags of ducks, the latter seeming to think the feeding here better than taking a chance by going farther south.

Mr K Drassall who has been farming the Kimmerly ranch for several years, is said to be moving back to his old District in Saskatchewan.

loween, as had been advertised. Instead, the members of the school board held a meeting and passed accounts.

## Liberals to Meet.

Under the auspices of the Liberal association of Jasper Edson federal riding, a meeting will be held at Town Hall, Stony Plain, Tues. Nov. 8, at 8 p.m. to elect delegates from the Stony Plain poll to the convention to be held in Edmonton on Wed., Nov. 8. All Liberals in Stony Plain poll are requested to be present.

## Stony Plain and District

Mr E O Barth, for whom Auctioneer Zucht held a very successful sale on Thursday last, is moving to Stony, having purchased the Mintz property on Station St.

That old-time hunter Mr Levi Stevens, started out on Monday for the big game district with his usual outfit. Among the other hunting outfits which went west this week was that of Ed Kohl and L Javorik.

The T. Young General Store shipped a car of potatoes on Monday.

The St Philip congregation, which put on the chicken supper Monday evening, were gratified to see so many in attendance.

Madame Certude "B.I.M.S.; highly-gifted phenologist, palmist, clairvoyant, psychic reader," keep her promise and paid Stony a return visit on Monday evening.

C. C. F. delegates of the new Federal Constituency of Jasper Edson met at Onaway this week, to nominate a candidate.

Posters are out, announcing a U. F. A. convention to be held here on Saturday next.

Mr Neil Sutherland, the well-known hockey authority, spent the week end in Stony, with friends.

Armbruster Lumber Co. got in another car of Black Diamond coal which is being sold off at a very reasonable price.

BUTTER AND EGGS WANTED at The Royal Cafe.

## Hockey Notes.

The Junior Hockey Club members met last Thursday at Christie's Cafe, and decided to reorganise for the coming season. The usual lot of good material is on hand to form a strong team. The club will operate on a different basis than last year. It is expected the next meeting of the Juniors, will take place some time after the Seniors meet, which will be soon. Bring on your ice!

Members of the Juvenile Hockey club held a reorganization meeting last evening. A report of this will appear in next issue.

## New Egg Grading.

New grade names and classifications for eggs to become effective shortly is announced. The grades in future will be: A A B C, taking the place of special, extra, 1st, 2nd, as at present. It is understood the words "new laid" will be used only in conjunction with grade A1 and the word "fresh" may be applied only to the grade of A1 and A.

All grades possessing the quality of grade A may be sold in that grade, irrespective of size. However, eggs of different sizes may be packed separately with the size indicated on the indicator. Storage eggs will not be sold higher than grade B.

## Curlers' Annual Meeting.

The annual meeting of the Stony Plain Curling club was held on the evening of Thurs., Oct. 26, with a fair number of members present.

Pres. McCulla opened the meeting with an address, and, after the minutes of the last meeting and the financial statement had been read, the matter of raising funds was brought to the attention of the members, and after considerable discussion it was decided that the Curling club would hold a dance in the near future.

The club decided, this year, to join up with the Alberta Curling Association, which will give teams from this club the right to play for different trophies, which should make interest in curling very much keener.

The membership fees for the coming season were not changed from last year, which are as follows—

Gentlemen, \$10 ; Ladies, \$2 50 ; New members who have not curled before \$5. The officers for the 1933 34 season are as follows: Geo. Oppertshausen, Pres.; Jas. Malloch, Vice-Pres.; W E H Lewis, Sec.-treas.; Executive committee: J W McCulla, A E Michael, Hy Oppertshausen.

After the election of the officers many of the old games of last season were played over again; and the members feel that we should have a good season this year, and will be glad to welcome any new players who wish to join the club.

Community Dance,  
Blueberry Schoolhouse  
Friday, November 3.

## The Sun's Calendar.

Nov. 3—Dance at Blueberry  
4—Tax sale, Stony Plain.  
4—U.F.A. Convention in Stony.  
7—Meeting of Liberals in Town Hall.  
10—Masquerade dance, Mewassin Schoolhouse.  
11—Remembrance Day.  
18—Inga's Secretary at Stony, to collect taxes.

## Don't Point a Gun at Anyone

Game Commissioner Clark has issued a warning to hunters against carrying loaded guns in autos or carelessly pointing firearms at anyone in a spirit of fun. Indignation had recently been expressed by residents of Riverside S.D., following an incident which caused grief to some children. Two sportsmen were making their way by motor car to a certain hunting spot and stopped to make some repairs to their car. Two children returning from school passed the car. One of the sportsmen, apparently in a spirit of fun, is said to have lifted his gun, pointed it at the 2 children and pulled the trigger. One of the two, a girl, was so frightened she became hysterical.

## On the Side.

The proposed plan to have members of the Town band operate the skating rink is said to be a good move. All the plan needs now is the okay of the Town council. Mr Gus Zucht, who operated the rink the past two seasons, gave good service to the patrons, and these will, no doubt, regret to see a change made.

Q Ambitious golfers driven off the local links by the snow are now enabled to keep up their golf form, thanks to a recent invention, which consists of a rubber mat and tee with a soft ball fastened to it by an elastic cord. Now, if some genius could invent a sympathetic and complacent attitude for friend wife, save an ex-change, the practice could proceed.

Q Golfing has its hazards. Mr J B Bertke of Covington, Kentucky, says so. On a recent visit to a golf course Mr. B. was struck in the eye with a ball that slipped from the hands of his golfing partner Mr. Reucha. Mr. B. sued the latter for 11,175 dollars for the loss of his eye; the court awarded him \$3433.

## Peck's CAPS

—are made for those men and young men who appreciate the little touch of refinement in head dress.

The most comfortable and most serviceable caps made for golf, motoring and all outing occasions, as well as street wear.

T. J. Hardwick, Agent.

## Town of Stony Plain.

Notice is hereby given that, under the provisions of the Tax Recovery Act, 1929, the Town of Stony Plain will offer for sale, by public auction, in the Town Hall, Stony Plain, on Saturday, the 4th day of November, 1933, at 2 o'clock in the afternoon, the following lands situated within the Town of Stony Plain:
